## NATIONAL SCIENCE AND TECHNOLOGY COUNCIL

Our Ref: NSTC/101/5/11

19<sup>th</sup> December, 2018

**Mr. Billy Peter Munyenembe**  
Mpima Flatland Mini Farm  
Kabwe

Dear Mr. Munyenembe,

**RE: APPLICATION FOR FUNDING OF A PROJECT UNDER THE SCIENCE AND TECHNOLOGY INNOVATION YOUTH FUND (STIYF)**

Reference is made to your submission of an application for funding of an innovation project under the 2017-2018 STIYF Funding cycle. The National Science and Technology Council (NSTC) wishes to sincerely thank you for your patience throughout the evaluation process.

The Council is pleased to inform you that your application for funding of your project titled "**Billy's electronic ARVs medicine dispensing machine (BEAMDAM)**" was successful and your innovation project was approved for funding. The total approved grant for the project is **One hundred and fifty thousand Kwacha (K150,000.00)** and the duration of the project is **Two (2) years** starting from **January 2019 to December 2020**.

It is a requirement in the STIYF guidelines that grant recipients must be affiliated to a recognized Research and Development (R&D) institution/Centre, which oversees the development of the project and through which the project funds will be disbursed. It is in this regard that NSTC will identify a suitable institution to affiliate you to.

Once the institution has been identified, the Council will invite you and the Institution of Affiliation to an induction workshop on the management of the grant, including grant conditions. Project Funds will only be released after the Agreement is signed and project inception conditions as indicated in the Agreement have been met.

The Council would like to congratulate you on this grant award and wish you success in your innovation development.

Yours sincerely,  
**NATIONAL SCIENCE AND TECHNOLOGY COUNCIL**

Filippo Zulu  
**Acting Executive Secretary**
